

Test/ standard		Test laboratory
DIN EN ISO 20743	Determination of antibacterial activity of textile products	biological test laboratory
DITF method ABW 02 according to ISO 22196	Measurement of antibacterial activity on plastics and other non-porous surfaces	biological test laboratory
DIN EN ISO 20645	Textile fabrics- Determination of antibacterial activity- Agar diffusion plate test	biological test laboratory
DITF method HYG 01	Determination of the biocontamination of surfaces: Contact plate method	biological test laboratory
DITF method HYG 02	Determination of airborne biocontamination	biological test laboratory
DIN EN ISO 11737-1	Determination of a population of microorganisms on products	biological test laboratory
DIN EN ISO 22612	Resistance to dry microbial penetration	biological test laboratory
DIN EN ISO 10993-5	Biological evaluation of medical devices- tests for in vitro cytotoxicity: Agar diffusion test	biological test laboratory
DIN EN ISO 10993-5	Biological evaluation of medical devices- tests for in vitro cytotoxicity: MTT test	biological test laboratory
DITF method KV 01/ TOX 04.2	Body compatibility test (wearing simulation and substance transfer, cytotoxicity test with fibroblasts)	biological test laboratory
DITF method TOX 05	Skin irritation test with human keratinocytes	biological test laboratory
